Language Learning for Social Purposes

Pitch

**We inspire you to think in
the many languages of
sustainability and lead the
scene to keep it green**

Context

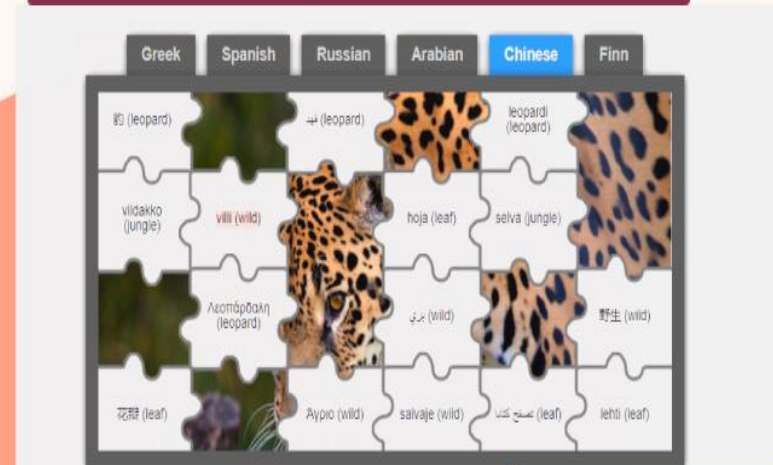

In the context of the current pandemic and all the inconveniences we face because of it, it felt meaningful to focus on the issue of environmental awareness:

- **Active citizenship and social action should be enhanced by education -not just in an informational way.**
- **Need to inspire students so as to form a more "active" mentality on sustainable awareness and take action with real-life everyday choices.**
- **Our solution explores the potential to achieve that through multilingual activities so as to prove that language learning can serve a social purpose.**
- **The digital design of the activities can also tackle our inability for face-to-face communication in forming active consciences during these difficult times.**

Impact

- Awareness to environmental issues.
- Awakening of linguistic and cultural consciousness.
- Inspire students to develop critical attitude, take initiative and become active citizens.
- Familiarity with technology. In other words, contribution to a more developed computer literacy on the student's part.
